

# WWDC Live: Jon Gotow of St. Clair Software

by [Brett Terpstra](#) on Jun 14th 2009

I was excited to speak with Jon Gotow of [St. Clair Software](#), creator of [Default Folder X](#), which is an invaluable tool to me. He is also an important voice in the [OpenMeta](#) debate and evolution happening right now, which will get its own article in the near future. He attended WWDC with his son, [Ben Gotow](#), and had a lot to say about the state of Apple and looking forward. Continue reading for the video.
